ABOUT US

Vedant Agro Technologies Pvt. Ltd. is the company floated by Agro Technologist **Mr. Shivaji Thorat**, who has rich experience with Zuari Agro Chemicals Ltd. The Concept behind floating this company was introduction & promotion of silicon use in Agriculture. Dr. N. K. Sawant renowned world scientist who has spent his whole life in silicon research in various countries worldwide has motivated and inspired Shivaji Thorat for this pioneer work in Agriculture. Silicon as a fertilizer has been used for various crops in many advanced countries, but in India so far it is not being used and as such farmers in our country are deprived off from the benefits of this element.

Continuous efforts taken by the team of our company since last 13 years, now the concept of silicon use for various crop has been well accepted by farming community.

We have the following Product Range.

Vedant Greensil (kaolin)

It is Kaolinite based silicon in powder form, which contains 95% silica compound. It is purified and sterilized so that it has no side effects and easily dissolves in water. It can be used for foliar spraying as well as through drip irrigation system. Dose : 3 to 5 gms per liter of water for spraying and 2 kg per acre through drip system.

Vedant Agrosil (Powder & Granulated)

It is natural mineral based form of Silicon which is used as soil application & rich in silicon content (SiO_2 70 to 75 %). It helps in increasing uptake of N.P. & K as well as improving soil health. It is very good for alkaline soils & sandy loam soils. It is available in 40 Kg powder as well as in granulation form.

Neutrasil

It is weak organic acid used for reducing pH of water as well as soil. It is to be used along with pesticides for reducing pH of spray solution and to be applied through drip for reducing pH of soil for better nutrient availability to the crop.

Vedant Aquasil

It is water absorbent polymer with potassium base. It absorbs water about 200 to 250 times more than its weight. It helps crops to thrive under water shortage condition, stores water in the soil and makes available to crops when it is required.

Vedant Greensil Drip

It is water soluble form of Silicon and Contains 95 to 98 % SiO_2 system as well as to foliar spraying. Available in 2 kg Packing. It can be applied through drip application.

Vedant Orthrosil

It is formulation of silicic Acid in Liquid form as Plants absorb silicon only in silicic acid form, it is readily available Silicic Acid for plants for quick adsorption and immediate results. Foliar as well as drip application.

Vedant copsil

It is copper compound in dust form to be used as soil dusting in agricultural crops. It acts as soil disinfectant and kills the spores of many fungal & bacterial disease. Extensively used in pomegranate orchards to control oily spot or Telya disease.

Vedant Greensil Plus

It is liquid formulation of silicon and Potassium which help in increasing size as well as color of the fruits and vegetable

Vedant Microsil

It is also formulation of silicic Acid in powder form, which contains 40 to 45 % silicic Acid, fully water soluble and can be given as foliar application or through drip system.

Vedant Growsil

It is natural organic form of plant growth promoter which consists of potassium humate with Botanical nutrients, marine proteins and animal proteins along with Amino Acid.

Vedant Virosil

It is natural organic form of plant protector, which prevents attack of virus on crop like, Tomato, Chilli, Banana, Bhendi etc. It consists of Eugenol, Thymal Proteins, carboxylic Acid etc. It gives better results when used as preventive against virus attack.

Vedant Phytosil

It is organic certified plant protector for controlling many fungal diseases on Vegetables & fruits. It contains Eugenol proteins, carboxylic Acid & Sodium Salts etc.

Vedant Greenstick

It is non - ionic sticker and spreader with silicon. It helps to spread pesticides evenly and deep penetration in to the leaves for better efficiency of the pesticides & fungicides.
